

SKILLS

- Talented in Figma, Adobe XD, Adobe Photoshop, Adobe Illustrator, After Effects, and Premiere Pro.
- Knowledgeable in the latest design trends and modern tools.
- Competent in creating wireframes, mockups, and visual assets.
- Experienced in HTML, JavaScript, and CSS.
- Proficient in responsive design (Angular JS, React JS, Tailwind CSS, SCSS, Bootstrap).
- Excellent attention to detail and time management skills.
- Strong written and verbal communication skills, translating complex concepts into clear language.
- Comfortable working with technical and non-technical collaborators.

WORK EXPERIENCE

International Rescue Committee – New York, NY

Web Designer / IT Communications Associate

January 2019 – April 2025

- Led a cross-functional team of 10 to draft, code, and publish 2 monthly IT Newsletters to communicate IT related information to the company.
- Architected and deployed 20+ internet website pages using HTML and CSS, to organize and update information under a single hub for different departments.
- Built and maintained 40+ high-quality intranet web pages with HTML, CSS, JavaScript, Photoshop, and Illustrator and ensured every page layout and appearance looked consistent and stayed on brand.
- Designed wireframes, mockups, and high-fidelity specifications and presented the concepts directly to management for approval.
- Developed the first filter button for the intranet's web pages to reduce page navigation time by 50%.
- Created branded images and videos for web, email, and social to educate and update users on IT related news on a monthly cadence.

PROJECTS

urGallery (Personal SaaS Project)

Product Engineer / UI/UX Designer

September 2025 – Current

- Created wireframes, ERDs, and user flows in Figma to shape product features, ensuring scalability and intuitive UX from the start.
- Engineered a dynamic portfolio/page editor with real-time UI updates, enabling users to create, edit, reorder, publish, and delete fully customizable portfolio pages.
- Designed initial branding and logo assets in Adobe Illustrator and integrating consistent UI/UX patterns for a clean, modern user experience.
- Managing end-to-end product delivery, balancing product vision, engineering execution, and design consistency in an early-stage startup-style environment.
- Collaborated with a development team, translating product requirements into technical tasks, presenting weekly updates, and guiding implementation of consistent UI patterns and brand standards.
